FRAME	Brushed aluminum alloy, bolted
TREAD	Molded studded anti-slip
WEIGHT CAPACITY	250 lb (113 kg)
FOLD	Flat, concertina
INCLUDED	Safety tether with metal clip
FEET	Non-slip rubber
ASSEMBLY	None - arrives ready to use
COLOR	Silver frame, black treads

Dimensions are approximate. Natural materials vary slightly from piece to piece.

KEY FEATURES

- **Rated to 250 lb.** Bolted aluminum alloy rather than plastic, so the top step doesn't flex.
- **Folds concertina-flat.** Lives behind the back seat instead of filling the trunk.
- **Tether included.** A metal clip anchors it to the car so it can't shift underfoot.

CONFIGURATIONS

CONFIGURATION	CATALOGUE NO.
Standard	VI-DS-00482-01

WHO IT FITS

Dogs up to 250 lb — labs, shepherds, retrievers. Four steps rather than a ramp, folding concertina-flat for the trunk.

WILL IT FIT?

Stairs suit dogs who still lift their legs well and prefer defined steps to a slope. If your dog is long-backed - a dachshund, corgi or frenchie - a ramp is usually the safer choice, because steps load the spine on every drop.

MATERIALS

Brushed aluminum alloy, bolted

CARE

Unzip and wash the cover as directed; spot-clean the core and let it dry fully.

WARRANTY & RETURNS

Frames and hardware: 5 years. Covers, foam, fabric and mesh: 1 year. Cover runs from delivery, for the original buyer; chewing, clawing, overloading, misuse and normal wear are not covered. Returns within 30 days of delivery, unused and in original packaging, with no restocking fee. If it arrives damaged or wrong, we pay the return shipping.

Setup & use

GETTING STARTED

1. **Set it up indoors.** Open the stairs on a flat floor at home, nowhere near the car. Let him walk up and down for treats until it is boring.
2. **Move it to the car.** Stand them at the tailgate and clip the tether so nothing shifts. Walk beside him the first few times.
3. **Watch the last step.** The top step onto the tailgate is the one dogs hesitate at. Guide him over it a few times and he will stop thinking about it.

BEFORE YOU START

- ☐ Height measured from the floor to the top of the bed, sofa or seat
- ☐ Floor space in front of the furniture for the depth of the stairs
- ☐ Hard floors: a non-slip base or rug underneath
- ☐ Treats for the first few sessions

PLACEMENT GUIDELINES

HEIGHT

Choose the step count whose top step sits just under the surface your dog is climbing onto, not above it.

POSITION

Push the stairs flush against the furniture so there is no gap at the top for a paw to slip into.

TRAINING

Teach going up first, one step at a time with treats; coming down is the part to practise most.

Safety. Do not exceed the listed weight limit. Keep the stairs pushed up against the furniture and check they do not slide before each use.
