

CAT TREE

Elm

Solid Wood Cat Tree, 43" Tall with Close-Set Levels for Older Cats

Older, heavier or less confident cats. Waist height at 110 cm with the levels a short hop apart – for a young athletic cat it may be too short to hold their interest.

SPECIFICATIONS

PRODUCT TYPE	Cat Tree
HEIGHT	110 cm, about waist height
LEVELS	Platforms spaced a short hop apart
POSTS	Sisal between the levels
BASE	A cubby at the bottom
FRAME	Solid timber rather than veneered board
ASSEMBLY	Bolt-together, around half an hour
BEST FOR	Older, heavier and less confident cats

Dimensions are approximate. Natural materials vary slightly from piece to piece.

KEY FEATURES

- **Levels set close together.** Each step is a short hop rather than a leap, for a cat who has started hesitating.
- **Solid timber, not veneered board.** Takes the landings and stays square.
- **Doubles as a step.** Set it beside a bed or sofa an older cat has stopped jumping onto.

CONFIGURATIONS

CONFIGURATION	CATALOGUE NO.
Standard	VI-KT-20834-01

WHO IT FITS

Older, heavier or less confident cats. Waist height at 110 cm with the levels a short hop apart — for a young athletic cat it may be too short to hold their interest.

WILL IT FIT?

At 110 cm it is about waist height, with the platforms spaced so each step is a short hop rather than a leap. It suits an older, heavier or less confident cat, and rooms where a tall tower would dominate. For a young athletic cat it may be too short to hold their interest.

MATERIALS

Solid timber rather than veneered board

CARE

Vacuum platforms; spot-clean fabric with a damp cloth; re-wrap worn sisal.

WARRANTY & RETURNS

Frames and hardware: 5 years. Covers, foam, fabric and mesh: 1 year. Cover runs from delivery, for the original buyer; chewing, clawing, overloading, misuse and normal wear are not covered. Returns within 30 days of delivery, unused and in original packaging, with no restocking fee. If it arrives damaged or wrong, we pay the return shipping.

Assembly & placement

GETTING STARTED

1. **Set it where they already jump.** Beside a bed or sofa an older cat has stopped jumping onto. It makes a good step as well as a tree.
2. **Build it where it will stand.** Bolt-together, around half an hour. Put it together in the room it will live in.
3. **Let the cubby be the first draw.** Cats go where they can hide before they climb. Leave the base cubby open and let the levels follow.

BEFORE YOU START

- ☐ A level spot near a window
- ☐ Floor-to-ceiling models: ceiling height measured against the adjustment range
- ☐ A wall strap for tall trees in homes with active or heavy cats

PLACEMENT GUIDELINES

POSITION

Near a window or in the room where people spend time; cats like a view and company.

STABILITY

Stand it on a level floor and anchor tall trees to the wall, especially for heavy or very active cats.

TENSION MODELS

Re-check the tension after the first week and every few months.

Safety. Check bolts and tension regularly. Replace worn sisal or damaged parts before they fail.
