WHO IT FITS

Dogs up to about 70 lb, on a 39-inch seat that sits 6 inches off the floor.

WILL IT FIT?

It is 39 inches wide and 25 deep - about the footprint of a small armchair, so measure the wall you have in mind. The arms take up the outer few inches at each end, so a dog stretching right out needs the full width. Best for dogs up to about 70 lb.

CARE

Remove and wash the cover as directed; air the foam and let everything dry fully before reassembling.

WARRANTY & RETURNS

Frames and hardware: 5 years. Covers, foam, fabric and mesh: 1 year. Cover runs from delivery, for the original buyer; chewing, clawing, overloading, misuse and normal wear are not covered. Returns within 30 days of delivery, unused and in original packaging, with no restocking fee. If it arrives damaged or wrong, we pay the return shipping.

Setup & use

GETTING STARTED

1. **Put it in the room you are in.** Not the spare room, not a corner. A dog turns down a good bed in the wrong place, every time.
2. **Put his blanket on it for a week.** Something that already smells of him, laid over the cushion. It stops being new furniture and starts being his.
3. **Wipe it, do not scrub it.** Microfiber leather takes a damp cloth. The cushion lifts straight out if it needs more than that.

BEFORE YOU START

- ☐ Your dog measured lying stretched out, nose to base of tail
- ☐ The spot your dog already chooses to sleep in
- ☐ Room for the bed away from radiators and drafts

PLACEMENT GUIDELINES

SIZE

Measure your dog lying stretched out, nose to base of tail, and add about 6 in (15 cm) so it can straighten out.

POSITION

Put the bed where your dog already sleeps; dogs choose spots for warmth, drafts and a view of the room.

SETTLING IN

A dog used to a soft bed may take a few nights to accept a firmer one. A familiar blanket on top helps.

Safety. Supervise dogs that chew. Keep the bed away from open fires and heaters.
